

Anastasiia Petrechenko

APPLICATION DEVELOPER

Result-oriented application developer at IBM. I have a positive mindset, high levels of character and integrity, and a keen awareness of continuous improvement. I am curious about new possibilities and focused on delivering quality inputs in a timely fashion.

EXPERIENCE

IBM, Global Business Services, Baton Rouge LA — Application Developer

June 2019 - PRESENT

- Lead Application Developer used Python to successfully develop an application of converting an XML file from Solution Manager to various SAP systems.
- Used Flask and REST to show the documentation in the browser and PySimpleGUI to make a user-friendly desktop application. Applied for a patent of the product.
- Completion of IBM Application development certificates in 6 months instead of 12: Python, JS, React, jQuery, NodeJS, Docker, Kubernetes, IBM Cloud, Microservices.
- Work seamlessly in an Agile team environment designing, testing, developing, deploying and maintaining high-quality software assets.

Seedcode, Seattle WA — Developer

2018 - 2019

- Optimized the process of customer support line by implementing personal auto-responses reducing the response time from 4 hours to 2.
- Implemented new features to the DayBack Calendar using JavaScript and its frameworks (NodeJS, MomentJS, jQuery, React): tooltip with different cities and their time zones, messages to Slack and Twilio using webhooks, contact information list from Salesforce.
- Provided excellent support to clients: constantly followed up with them, helped to debug their problems, advised on the best solution.

BECU, Tukwila WA — Member Consultant

2016 - 2018

- Became a top performer with my knowledge of products and providing excellent customer service, including the areas of business services, consumer lending, deposit servicing, IRA, POA, and Fiduciary accounts.

Arsenal Factory, Ukraine — Developer Intern

2012 - 2014

- Participated in designing and implementing the back-end of the Research dashboard using Ajax, Express, NodeJS, SQL.
- Gathered data from API/web services via AJAX-JSON calls and updating the DOM within the result sets.

EDUCATION

42 Silicon Valley, Fremont CA — Programming School

2018 - 2019

Created required projects using C language: FDF (3D graphic representation of a relief landscape), ft_ssl_md5 (the MD5 and SHA256 Hashing Algorithms), init (system administration and networking), docker.

National Technical University of Ukraine, Ukraine — Information Technologies

2012 - 2014

Baton Rouge, LA

(508) 680-4587
